International application No. PCT/EP 03/07299

- 1) This Examining Authority agrees with the objection put forward by the Search Authority as to lack of unity (Rule 13.1 PCT) and considers that the following separate inventions are not so linked as to form a single general inventive concept:
  - I: Claims 1-2: portable cleaning appliance with pipe for feeding stream of fluid directly to rotating tool...
  - II: Claims 3-6: portable cleaning brush with a hinged handle capable of being locked in different positions
- 2) With letter of 4/03/2004 - and as confirmed by the representative by phone on 21/06/2004 - the applicant restricted the claims and requested the examination of claims 3-6.
- 3) Documents **US-A-5870790** (see col. 6, line 55 - col. 7, line 50; figures 18-21) and **US-A-5423102** (see col. 3, lines 44-67; col. 5, lines 20-43; figures 1, 2, 4, 6) both disclose a portable cleaning appliance comprising all independent claim 3 and dependent claim 4 features. In particular, with regard to document **US-A-5870790**, see the shell (handle ) (403) hinged to the body (402) with means (460, 462) for locking the relative positions.

The present application does not meet therefore the requirements of Article 33(1) PCT, because the subject-matter of claims 3, 4 is not new in the sense of Article 33(2) PCT.
- 4) The additional features disclosed in dependent claims 5, 6 seem to relate merely to constructional measures coming within the scope of the customary practice followed by persons skilled in the art and involving no unexpected effects. Thus, the subject-matter of said claims does not seem to involve an inventive step and does not satisfy the criterion set forth in Article 33(3) PCT.
